## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on 05/08/2006 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 6-12 and 26-29 are rejected under 35 U.S.C. 102(b) as being unpatentable over Tai, for reasons cited in the previous action.

### ***Claim Rejections - 35 USC § 103***

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and

Art Unit: 1713

the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 2, 6-12 and 26-29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mooney et al., for reasons cited in the previous action.

### ***Response to Arguments***

6. Applicant's arguments filed 05/08/2006 have been fully considered but they are not persuasive.

7. Firstly, with regard to the arguments against Tai, the polymer network of Tai may comprise pharmaceutical formulations and is water insolubility (hydrophobic).

Applicant refers to Tai as existing in the presence of water, but that is only one of the embodiments taught in Tai. The major embodiment is anhydrous and does not require water, i.e., an oil-phase composition. The product itself does not require water. Further, the composition of Tai is a polymer network, so there is necessary some entangling and entrapment of the hydrophobic polymer in the crosslinked polymer.

8. Regarding Mooney et al., as with Tai above, the composition of Mooney exist as a network, so there is necessary some entangling and entrapment of the hydrophobic polymer in the crosslinked polymer.

9. Further, in response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which

Art Unit: 1713

applicant relies (i.e., interpenetrated crosslinked polymer network (ICPN)) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification, limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

Also, the fact that applicant may have recognized other advantages which would flow naturally from following the suggestion of the prior art cannot be the basis for patentability when the differences would otherwise be obvious. See *Ex parte Obiaya*, 227 USPQ 58, 60 (Bd. Pat. App. & Inter. 1985).
